

Components of an Equitable 100%

- Targeted approach
- Job creation especially for harder to employ and unemployed
- Affordable, accessible and far-reaching benefits
- Investments in highly impacted and lower income communities
- Local energy ownership and control
- Inclusive and equitable public participation and governance
- Address life-cycle of dirty energy sources

100% Renewable Electricity: Transition away from fossil fuels

- 100% Renewable Electricity required by 2030
- Far more new renewable energy built
- Focus on Vermont renewables, providing resilience

Gov. Phil Scott on the climate crisis:
"I'm not looking to reinvent the wheel, I'm not looking to come out with something dramatic."

9/24/19

Governor Scott: Did you mean it when you said Vermont would meet its Paris Climate Goals?
