

An aerial photograph of a dense forest with a winding river. The trees are mostly green, with some yellow and orange foliage scattered throughout, suggesting an autumn setting. The river is dark and meanders through the center of the forest.

# The Global Warming Solutions Act

Because the climate can't wait, so neither can we

## Where emissions increases and decreases have come from across the region, 1990 vs 2016<sup>1</sup>

<sup>1</sup> State and provincial emissions inventories (see footnotes on page 10).

# Goals Aren't Working

# THE GLOBAL WARMING SOLUTIONS ACT

- GHG Goals → Requirements
  - 25% (2005) by 2025
  - 40% (1990) by 2030
  - 80% (1990) by 2050
- Creates Climate Council w/ Subcommittees
  - Rural Resilience
  - Cross-Sector Mitigation
  - Agriculture & Ecosystems
  - Just Transition
- Council creates a Climate Action Plan (due December 2021)
- Also has strong focus on climate adaptation and resilience

# We Know How To Solve Climate Change

Reduce Emissions

Remove Emissions

Adapt to Emissions

Now, we get  
to work.
